PROFILE

Systems Analyst with 3 years of experience focused on software solution design and optimization. I leverage Full-Stack Development (React, Next.js) skills to implement efficient and scalable web solutions. Specialized in advanced database optimization for high performance.

EDUCATION

2012-2017
BACHELOR OF SCIENCE
Colegio Las Colinas

2018-2022
SYSTEMS ANALYST
Escuela Da Vinci

LANGUAGES
English - B2
Spanish - native

EXPERIENCE

WEB DEVELOPER
EngAssist / Dec. 2022 - Jun. 2023
Fort Myers USA - Remote

I developed the corporate website from scratch (Full-Time) using HTML, CSS, and React. I led the DevOps tasks for deployment and managed the SEO strategy for six months. I collaborated 100% in English with the Marketing team and stakeholders via Teams.

FULL-STACK DEVELOPER
Select Structural / Jun. 2023 - Jan. 2024
Fort Myers USA - Remoto

I developed the complete corporate web application (Front-End and Back-End) for the company, working full-time in a remote environment. I focused on creating dynamic and responsive user interfaces, using technologies like React, JavaScript, HTML, and CSS. I led the development and implementation of the business logic and Front-End functionality. I worked directly with the Design and Marketing teams to ensure the web development met project objectives.

FOUNDER AND FULL-STACK DEVELOPER
Bellum Software / 2024 - Present
Buenos aires - Remoto

Own Web Development Agency, focused on creating customized digital solutions.

- Successfully delivered more than 20 web applications to clients, acting as the lead developer and consultant.
- Responsible for the End-to-End development of products, applying best practices in React, Next.js, and database management.
- Comprehensive management of client relationships, ensuring technical solutions met business objectives.

FEATURED PROJECTS
